---

Dear Chairperson Martin & SEC Committee & Sub Committee Members,

When the Certificate for Antrim Wind was issued, the lighting stipulation for the fifty story turbines was that there would be no lighting unless there were aircraft in the area.

Any other post installation lighting conditions are out of compliance with the stipulations of the certificate.

What good is a certificate if certificate permitting rules and conditions are ignored post installation?

Please uphold your own rules and the terms this committee approved and only the terms this committee approved.

Thank you.

Larry Goodman
